

VOLUME SEVENTY THREE

# ADVANCES IN MICROBIAL PHYSIOLOGY

Mahidol University  
Faculty of Science

Edited by

Stang Mongkolkeha Library and Information Division

**ROBERT K. POOLE**

*West Riding Professor of Microbiology  
Department of Molecular Biology and Biotechnology  
The University of Sheffield  
Firth Court, Western Bank  
Sheffield, UK*

**ACADEMIC PRESS**

An imprint of Elsevier

# CONTENTS

Contributors

vii

<b>1. Host-Derived Nitric Oxide and Its Antibacterial Effects in the Urinary Tract</b>	<b>1</b>
Lovisa Svensson, Mirjana Poljakovic, Isak Demirel, Charlotte Sahlberg, and Katarina Persson	
1. Introduction	2
2. Urinary Tract Infection	3
3. Uropathogenic <i>E. coli</i>	4
4. Host Response Mechanisms in UTI	9
5. Host Production of Nitric Oxide in the Urinary Tract	14
6. Antibacterial Effects of Nitric Oxide and RNS on Uropathogenic <i>E. coli</i>	27
7. UTI Treatment: The Potential of Nitric Oxide	40
References	45
<b>2. Nitric Oxide Stress as a Metabolic Flux</b>	<b>63</b>
Mark P. Brynildsen	
1. NO <sup>•</sup> Stress and Its Connection to Metabolic Engineering	64
2. Chemical Inhibitors of NO <sup>•</sup> Detoxification Enzymes	66
3. Closing the NO <sup>•</sup> Material Balance	68
4. System Perturbations Through Flux Control	70
5. Blind Spots From a Flux Vantage	71
6. Concluding Remarks and Future Prospects	72
Acknowledgments	73
References	73
<b>3. Antibiotic Lethality and Membrane Bioenergetics</b>	<b>77</b>
Martin I. Voskuil, Christopher R. Covey, and Nicholas D. Walter	
1. Introduction	78
2. Universal Hypotheses of Antibiotic Lethality	78
3. Conditions That Affect pH Homeostasis and Modulate Antibiotic Lethality	98
4. Antibiotics and Conditions That Promote Membrane Depolarization	109
5. Conclusions and Future Perspectives	112
Acknowledgments	113
References	113

---

<b>4. Novel Antibacterials: Alternatives to Traditional Antibiotics</b>	<b>123</b>
Jonathan W. Betts, Michael Hornsey, and Roberto M. La Ragione	
1. Introduction	124
2. Phytochemicals	125
3. Metals	141
4. Conclusions	155
References	156
Further Reading	169
<b>5. Biotechnological Applications of Bioactive Peptides From Marine Sources</b>	<b>171</b>
Daniela Giordano, Maria Costantini, Daniela Coppola, Chiara Lauritano, Laura Núñez Pons, Nadia Ruocco, Guido di Prisco, Adrianna Ianora, and Cinzia Verde	
1. Marine Biotechnology in the Genomic and Postgenomic Era	172
2. Marine Bioactive Peptides	175
3. Marine Peptides With Antimicrobial Activity	180
4. Marine Peptides With Anticancer Activity	197
5. Other Activities	201
6. Conclusions and Future Perspectives	204
Acknowledgments	205
References	205
