

VOLUME ONE HUNDRED AND THREE

# ADVANCES IN GENETICS

Edited by

**DHAVENDRA KUMAR**

*Division of Cancer and Genetics,  
Institute of Medical Genetics,  
Cardiff University School of Medicine, Cardiff;  
The Genomic Policy Unit,  
The University of South Wales, Pontypridd,  
United Kingdom*

**ACADEMIC PRESS**

An imprint of Elsevier

# Contents

<i>Contributors</i>	<i>vii</i>
<i>Preface</i>	<i>ix</i>
<b>1. Multi-omics approaches for strategic improvement of stress tolerance in underutilized crop species: A climate change perspective</b>	<b>1</b>
Mehanathan Muthamilarasan, Nagendra Kumar Singh, and Manoj Prasad	
1. Introduction	2
2. Omics approaches to studying NUCS	7
3. Status of crop improvement programs in NUCS	18
4. Integrating omics for strategic improvement of stress tolerance	25
5. Concluding remarks	28
Acknowledgments	28
References	28
<b>2. Understanding human DNA variants affecting pre-mRNA splicing in the NGS era</b>	<b>39</b>
Luiz Gustavo Dufner-Almeida, Ramon Torreglosa do Carmo, Cibele Masotti, and Luciana Amaral Haddad	
1. Introduction	40
2. Pre-mRNA splicing	40
3. DNA variants affecting pre-mRNA splicing	51
4. Pre-mRNA splicing alterations and cancer	70
5. Concluding remarks	76
Acknowledgments	77
References	77
<b>3. Finding a cure for tuberous sclerosis complex: From genetics through to targeted drug therapies</b>	<b>91</b>
Lauren J. McEneaney and Andrew R. Tee	
1. Introduction	91
Acknowledgments	115
Conflict of interest	115
References	115

---

<b>4. Population-scale genomics—Enabling precision public health</b>	<b>119</b>
Ambily Sivadas and Vinod Scaria	
1. Introduction	120
2. Tools and resources to enable analysis	129
3. Precision medicine	131
4. Pharmacogenomics on population-scale genomic data	133
5. Ethnic differences in pharmacogenetics	138
6. Role of population stratification and admixture in pharmacogenomic inference	144
7. Pharmacogenomics in drug discovery and development	145
8. Challenges and future directions	146
9. Conclusions	150
References	150
<b>5. <i>CDK13</i>-related disorder</b>	<b>163</b>
Mark James Hamilton and Mohnish Suri	
1. Introduction	164
2. Phenotype of the <i>CDK13</i> -related disorder	171
3. Mutational spectrum of <i>CDK13</i>	174
4. Genotype-phenotype correlations	174
5. Pathological mechanisms of mutations in <i>CDK13</i>	175
6. Differential diagnosis of <i>CDK13</i> -disorder	177
7. Medical management of affected individuals	178
8. Future directions	179
References	180
<b>6. The role of inherited genetic variants in colorectal polyposis syndromes</b>	<b>183</b>
E. Short and J. Sampson	
1. Introduction	184
2. The colorectal polyposis syndromes	190
3. Clinical management of patients with colorectal polyposis	202
4. “Unexplained” colorectal polyposis	203
5. Summary	208
Acknowledgments	209
References	209
Further reading	217
