Preface

xvii

1. Evolution of proopiomelanocortin	1
Ana Rocha, Alejandra Godino-Gimeno, and José Miguel Cerdá-Reverter	
1. Introduction	1
2. Evolution of opioid peptides and nociceptin/orphanin family	2
3. POMC bauplan evolution	10
Acknowledgments	13
Conflict of interest	13
References	13
2. Structure and dynamics of dynorphin peptide and its receptor	17
Guillaume Ferré, Georges Czaplicki, Pascal Demange, and Alain Milon	
1. Dynorphin: A neuropeptide involved in pain, addiction and mood regulation	18
2. The molecular mechanism of action of dynorphin: Research and hypotheses prior to KOP cloning	22
3. KOP cloning, site-directed mutagenesis and heterologous expression systems	24
4. Structure and dynamics of dynorphin and its receptor based on experimental 3D structures	26
5. Building 3D models of dynorphin-KOP complexes	30
6. Development of novel KOP ligands based on structural knowledge	33
7. Conclusions and future perspectives	34
References	35
3. Molecular aspects of delta opioid receptors	49
Louis Gendron, Karim Nagi, Manel Zeghal, Patrick M. Giguère, and Graciela Pineyro	
1. The delta opioid receptor (DOP)	50
2. Advances in the resolution of GPCR structures	51
3. Trafficking of DOP to the plasma membrane	61
4. Molecular mechanisms of DOP signaling	66
5. Molecular mechanisms underlying regulation of DOP signaling	70

6. Conclusions	76
Acknowledgments	76
References	76
4. The role of heat shock protein 90 in regulating pain, opioid signaling, and opioid antinociception	91
John M. Streicher	
1. Introduction	92
2. Hsp90 in pain	93
3. Hsp90 in opioid signaling and antinociception	95
4. Conclusion	98
Acknowledgments	99
References	99
5. Enkephalinase regulation	105
Manuel Ramírez-Sánchez, Isabel Prieto, Ana-Belén Segarra, Magdalena Martínez-Cañamero, Inmaculada Banegas, and Marc de Gasparo	
1. Enkephalins and enkephalinases	106
2. Brain distribution and development (regional and subcellular)	108
3. Endocrine regulation	112
4. Diet	115
5. Daily rhythm	118
6. Stress	119
7. Neurotransmitters interactions	121
8. Conclusions and future directions	124
Acknowledgments	124
References	124
6. Limbic circuit connectivity and the stress response: New insights into the mammalian nociceptin peptide system	131
Allison Jane Fulford and Sarah Keskes	
1. Mechanisms underlying the stress modulatory effects of the neuropeptide nociceptin	132
2. Neuropharmacological basis of nociceptin effects in stress and anxiety	134
3. Stress and the thalamic reticular nucleus	136
4. Nociceptin and neurodevelopmental disorders	139
5. Conclusions	140
References	141
Further reading	145

7. Enkephalins and ACTH in the mammalian nervous system	147
Ewing Duque-Díaz, Olga Alvarez-Ojeda, and Rafael Coveñas	
1. Introduction	148
2. Historical background	148
3. Structure of the enkephalin/ACTH genes	150
4. Processing of the precursors	151
5. Tissue distribution	154
6. Receptors and signaling cascades	158
7. Biological actions	162
8. Pathophysiology	169
9. Conclusion and future perspectives	181
Acknowledgments	181
References	182
8. Opioids and the hormone oxytocin	195
Leda Kovatsi and Kakia Nikolaou	
1. Introduction	196
2. Effects of endogenous and exogenously administered opioids on brain OT systems	197
3. Effects of endogenous and exogenously administered oxytocin on opioid use disorders	205
4. Discussion	209
5. Conclusions	215
References	216
Further reading	225
9. Estrogens as arbiters of sex-specific and reproductive cycle-dependent opioid analgesic mechanisms	227
Alan R. Gintzler, Emiliya M. Storman, and Nai-Jiang Liu	
1. Introduction	228
2. Sexually dimorphic opioid mechanisms mediate comparable opioid analgesia	230
3. Influence of estrogens on the physical relationship of MOR and KOR	231
4. Estrogens can influence the balance between antinociception and pronociception induced by dynorphin-KOR signaling	232
5. Spinal ER-mGluR1 signaling suppresses EM2 analgesia	233
6. Estrogenic signaling suppresses <i>endogenous</i> spinal EM2 release	234
7. Estrogenic signaling enables coordination of spinal EM2 utilization with physiological demand	235

8. Collaboration between spinally- and ovarian-produced estrogens	235
9. Multiple subpopulations of CNS aromatase and mER α	236
10. Conclusions	239
Disclosures	239
References	239
10. Opioids and reproduction	247
Beata Seeber, Bettina Böttcher, Elisabeth D'Costa, and Ludwig Wildt	
1. Introduction	248
2. Effects of opioids in the central nervous system on the reproductive system	249
3. Peripheral action of the opioid system	255
4. Pathophysiology of the opioid system in reproductive disorders	261
5. Opioids in pregnancy	265
6. Conclusion	270
References	271
11. Kappa opioid receptor and oligodendrocyte remyelination	281
Fei Wang and Feng Mei	
1. Oligodendrocyte and remyelination	282
2. Opioids in regulating oligodendroglial differentiation	285
3. Endogenous opioid signaling in oligodendroglia	289
Acknowledgments	291
References	291
12. Inhibitory role of G$_i$-coupled receptors on cAMP-driven cancers with focus on opioid receptors in lung adenocarcinoma and its stem cells	299
Hildegard M. Schuller	
1. Introduction	300
2. Antagonistic effects of G $_s$ - and G $_i$ -coupled receptors on pulmonary adenocarcinoma and its stem cells	301
3. Anti-carcinogenic effects of methadone	305
4. Anti-carcinogenic effects of cannabinoids	305
5. Conclusions	306
References	307

13. Prenatal ethanol exposure and enkephalinergic neurotransmission	313
Milagros Méndez, Karla Hernández-Fonseca, and Paula Abate	
1. Introduction	314
2. Alcohol reinforcement: Activation of dopaminergic mesocorticolimbic transmission	316
3. Role of opioid peptides in alcohol reinforcement	317
4. Alcohol effects on enkephalinergic and β -endorphinergic transmission	318
5. Conclusions	331
References	331
