About us

Since 1874, IOP Publishing has been delivering scientific publishing excellence through our strong portfolio of journals and ebooks, which includes some of the world's leading specialist titles across the physics spectrum. Researchers and librarians are choosing IOP Publishing to secure first-rate research outcomes and support the success of their students.

As the largest society physics publisher, we publish some of the world's leading specialist titles in fields across the physics spectrum; if your programme includes physics, materials science, astronomy and astrophysics, biosciences, nuclear or plasma science, then you can't be without IOP content for the best research outcomes.

Research impact

- We publish 15% of the world's very best physical sciences research; papers which receive 25 citations or more, and which represent the top 10% of published research. These are the papers being read, getting cited, and making impact. Can you allow your physicists not to have access to such a significant part of the research that's directly shaping the progress of science and the world around us?
- We are the world's largest society physics publisher in terms of both published articles and citations, and the second largest physics publisher overall*
- Almost half of all the world's Nobel prize winners in physics have published articles with us
- We publish all three of the world's leading journals in plasma science
- Our portfolio boasts double the citations of any other publisher in astronomy and astrophysics
- With an average receipt to publication time of just 120 days, your researchers will have access to the very latest research
- We are one of the largest publishers of review articles in physics and related fields
- We publish 30 journals in the top quartile for impact factor and 50 in the top two quartiles for impact factor, and 80% of our journals saw an impact factor increase in 2018

*based on 13 subject categories in physics and related subjects by Web of Science

Broad reach

- Our journals publish articles across no less than 40 subject areas**, reaching beyond physics and into medicine, mathematics, earth science, neuroscience, biophysics, chemistry and engineering to name just a few.
- Our established ebook programme features more than 500 books in 16 subject areas, and authors from across the globe, allowing us to connect with the entire physics community.
- We partner with more than 30 scientific organizations from around the world, each at the forefront of their fields, so that we can provide you with a wealth of expertise in one subscription and one online location. These include the American Astronomical Society, the Biophysical Society, London Mathematical Society and the Institute of Physics and Engineering in Medicine.
- A new partnership with The Electrochemistry Society to publish flagship publications including Journal of the Electrochemistry Society and ECS Journal of Solid-State Science and Technology.
