ACADEMIC PRESS

An imprint of Elsevier

CONTENTS

Contributors

vii

1. The Microglial Response to Neurodegenerative Disease	1
Wilbur M. Song and Marco Colonna	
1. Introduction	2
2. A Unified View of Neurodegeneration-Associated Microglia	3
3. Functions of DAM During Neurodegenerative Disease	12
4. Genetic Implication of Microglia in Neurodegenerative Diseases	23
5. Conclusions	32
Acknowledgments	34
References	35
2. The First B-Cell Tolerance Checkpoint in Mice and Humans: Control by AID	51
Masayuki Kuraoka, Eric Meffre, and Garnett Kelsoe	
1. Introduction	52
2. AICDA and AID	54
3. Phylogeny of AID Expression in Vertebrates	56
4. AID Expression During Mouse B-Cell Development	61
5. AID Expression in Human Immature B Cells	70
6. How Does AID Mediate Central B-Cell Tolerance?	74
7. Discussion	78
Acknowledgments	83
References	83
3. RAG Chromatin Scanning During V(D)J Recombination and Chromatin Loop Extrusion are Related Processes	93
Sherry G. Lin, Zhaoqing Ba, Frederick W. Alt, and Yu Zhang	
1. Immunoglobulin Heavy and Light Chain Loci	94
2. V(D)J Recombination Mechanism	96
3. Contact Loops Within the Genome May Often Be Formed by Chromatin Loop Extrusion	106

4. Robust New Genome-Wide Assays for Studies of V(D)J Recombination	111
5. RAG Unidirectionally Scans Chromatin of Endogenous Antigen Receptor Loci for Cleaving Substrates	116
6. Broader Significance and Future Directions	125
Acknowledgments	126
Declaration of Interests	126
References	127
