Preface xi

1. Sphingolipids Signaling in Lamellipodia Formation and Enhancement of Endothelial Barrier Function 1

Panfeng Fu, Mark Shaaya, Anantha Harijith, Jeffrey R. Jacobson, Andrei Karginov, and Viswanathan Natarajan

- 1. Introduction 2
- 2. Dynamics of Lamellipodia 4
- 3. Modulation of Lung Endothelial Barrier Function by Inflammatory and Protective Agents 8
- 4. Mechanisms of Lamellipodia Formation and Endothelial Barrier Enhancement 9
- 5. Reactive Oxygen Species, Lamellipodia Formation, and Endothelial Barrier Enhancement 17
- 6. Oxidized Phospholipids, Lamellipodia Formation, and Endothelial Barrier Enhancement 19
- 7. Simvastatin Activation of S1P1 in Endothelial Barrier Enhancement 20
- 8. Conclusions and Future Directions 21
- Acknowledgments 22
- References 22

2. The Pulmonary Endothelial Glycocalyx in ARDS: A Critical Role for Heparan Sulfate 33

Wells B. LaRivière and Eric P. Schmidt

- 1. Emerging Understanding and Historical Underappreciation of Endothelial Glycocalyx Structure and Function 34
- 2. Polysaccharide Structure of the Endothelial Glycocalyx: A Focus on Heparan Sulfate 37
- 3. Pulmonary Endothelial Glycocalyx Heparan Sulfate Is Essential for Lung Homeostasis 39
- 4. Fate of Glycocalyx Heparan Sulfate During Sepsis-Induced ARDS Onset and Resolution 41
- 5. Multisystemic Consequences of Glycocalyx Degradation 43

6. Unanswered Questions: The Endothelial Glycocalyx in Direct vs. Indirect Lung Injury	45
7. Summary	47
References	47
3. Cholesterol Regulation of Pulmonary Endothelial Calcium Homeostasis	53
Bojun Zhang, Michael L. Paffett, Jay S. Naik, Nikki L. Jernigan, Benjimen R. Walker, and Thomas C. Resta	
1. Introduction	55
2. Endothelial Ca ²⁺ Channels in the Pulmonary Circulation	57
3. Hypoxic Regulation of Pulmonary Endothelial Ca ²⁺ Entry	63
4. Role of Membrane Cholesterol in Regulating Endothelial Ca ²⁺ Entry in CH-Induced PH	67
5. Potential Mechanisms of Diminished Endothelial Membrane Cholesterol by CH	76
6. Summary and Conclusions	78
References	79
4. Endothelial Protrusions in Junctional Integrity and Barrier Function	93
Natascha G. Alves, Zeinab Y. Motawe, Sarah Y. Yuan, and Jerome W. Breslin	
1. Introduction	94
2. Determinants of Endothelial Barrier Function	95
3. Methods to Study Endothelial Barrier Function	98
4. Microvascular Hyperpermeability in Injury or Disease Conditions	106
5. Evidence of a Role for Local Lamellipodia in the Control of Endothelial Barrier Function	118
6. Conclusions	126
Acknowledgments	126
References	126
5. Cortical Actin Dynamics in Endothelial Permeability	141
Patrick Belvitch, Yu Maw Htwe, Mary E. Brown, and Steven Dudek	
1. The Pulmonary Endothelial Cell Membrane and Physiology	142
2. Actin Structure and Force Generation	145
3. Endothelial Cell Membrane Morphology and Barrier Function	147
4. Membrane-Related Signaling and Barrier Function	150
5. Protein Regulation of Cortical Actin	155

6. Junctional Complexes Link Membrane to Cytoskeleton	158
7. New Insights Into Cytoskeletal and Membrane Imaging	163
8. Conclusion	174
Acknowledgments	175
References	175
6. Endothelial Extracellular Vesicles in Pulmonary Function and Disease	197
Eleftheria Letsiou and Natalie Bauer	
1. Introduction	198
2. Overview of Endothelial Extracellular Vesicles (EVs)	199
3. Endothelial EVs and Lung Diseases	214
4. Conclusions and Future Directions	234
Acknowledgments	243
References	243
7. Caveolin and Endothelial NO Signaling	257
Suellen D.S. Oliveira and Richard D. Minshall	
1. Endothelial Cell Caveolin-1 and Nitric Oxide Synthase: An Overview	258
2. Lung Endothelial Cell Cav-1 and eNOS-Mediated Signaling During Cell Quiescence vs. Activation	261
3. Depletion of Endothelial Cell Cav-1 and eNOS Expression: Role in Acute and Chronic Pulmonary Vascular Diseases	265
4. Endothelial Cell Phenotype Switching During Lung Inflammatory Response: Role of Cav-1 Depletion and eNOS Uncoupling?	269
5. Conclusion and Future Directions	272
Acknowledgments	273
References	273
