

VOLUME ONE HUNDRED AND FORTY TWO

# INTERNATIONAL REVIEW OF NEUROBIOLOGY

Imaging in Movement Disorders:  
Imaging in Atypical Parkinsonism  
and Familial Movement Disorders

Edited by

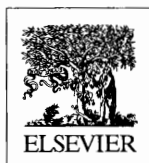

**MARIOS POLITIS, MD MSc DIC PhD FRCP FEAN**

*Professor of Neurology & Neuroimaging,  
Director, Neurodegeneration Imaging Group,  
Institute of Psychiatry, Psychology and Neuroscience,  
King's College London, United Kingdom*

Mahidol University  
Faculty of Science

Stang Mengkolsuk Library and Information Division

**ACADEMIC PRESS**

An imprint of Elsevier

# CONTENTS

<i>Contributors</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>
<i>Acknowledgments</i>	<i>xiii</i>

## Section 1

### **Imaging Applications in Atypical Parkinsonism**

<b>1. PET Molecular Imaging in Atypical Parkinsonism</b>	<b>3</b>
Zheyu Xu, Javier Arbizu, and Nicola Pavese	
1. Introduction	4
2. Multiple System Atrophy	6
3. Progressive Supranuclear Palsy	16
4. Corticobasal Degeneration	23
References	27
<b>2. SPECT Molecular Imaging in Atypical Parkinsonism</b>	<b>37</b>
Joachim Brumberg and Ioannis U. Isaïas	
1. Introduction	38
2. SPECT Molecular Imaging	39
3. SPECT Imaging in Atypical Parkinsonism	43
4. Clinical Utility of SPECT Imaging	49
5. Conclusions	54
References	55
<b>3. Structural Imaging in Atypical Parkinsonism</b>	<b>67</b>
Beatrice Heim, Florian Krismer, and Klaus Seppi	
1. Introduction	69
2. Techniques	70
3. Structural MRI as Diagnostic Tool for APDs	77
4. Structural MRI as a Surrogate Marker of Disease Progression	128
5. Conclusion and Future Development	131
References	134

<b>4. Functional MRI in Atypical Parkinsonisms</b>	<b>149</b>
Federica Agosta, Elisabetta Sarasso, and Massimo Filippi	
1. Introduction	150
2. fMRI in Multiple System Atrophy	158
3. fMRI in Corticobasal Syndrome	162
4. fMRI in Progressive Supranuclear Palsy Syndromes	164
5. Conclusions	170
References	170

## Section 2

### Imaging Applications in Familial Movement Disorders

<b>5. PET Molecular Imaging in Familial Parkinson's Disease</b>	<b>177</b>
Michele Matarazzo, Daryl Wile, Melissa Mackenzie, and A. Jon Stoessl	
1. Introduction	178
2. Autosomal Dominant Parkinsonism	179
3. Autosomal Recessive Parkinsonism	199
4. X-Linked Parkinsonism	208
5. Future Directions	209
6. Closing Remarks	210
References	210
<b>6. SPECT Molecular Imaging in Familial Parkinson's Disease</b>	<b>225</b>
Andrea Varrone and Maria Teresa Pellecchia	
1. Introduction to Familial Parkinson's Disease	226
2. Dopamine Transporter SPECT Imaging in Subjects With Mutation of Genetic Loci Typically Associated With Parkinson's Disease	230
3. Genetic Parkinson's Disease and Dopaminergic Imaging	245
4. Disorders With Expansion of Trinucleotide Repeats Associated With Parkinsonism	253
References	256
<b>7. Structural and Functional MRI in Familial Parkinson's Disease</b>	<b>261</b>
Avner Thaler	
1. Introduction	261
2. MR Imaging in Genetic Parkinson's Disease	267
3. Resting State fMRI in Genetic Parkinson's Disease	279
4. Concluding Remarks	282
References	283

<b>8. Molecular Imaging in Huntington's Disease</b>	<b>289</b>
Heather Wilson and Marios Politis	
1. Introduction	290
2. Imaging Brain Metabolism in Huntington's Disease	292
3. Imaging the Dopaminergic System in Huntington's Disease	306
4. Imaging Phosphodiesterases in Huntington's Disease	309
5. Imaging Neuroinflammation in Huntington's Disease	311
6. Imaging Adenosine Receptors in Huntington's Disease	312
7. Imaging the Cannabinoid System in Huntington's Disease	313
8. Imaging the Opioid System in Huntington's Disease	315
9. Imaging GABA Receptors in Huntington's Disease	315
10. Potential Future Targets for Imaging in Huntington's Disease	317
11. Conclusions	321
References	322
<b>9. Structural Magnetic Resonance Imaging in Huntington's Disease</b>	<b>335</b>
Heather Wilson, George Dervenoulas, and Marios Politis	
1. Introduction	336
2. Structural Magnetic Resonance Imaging Techniques	351
3. Structural MRI Analysis Methodology	356
4. Volumetric MRI Studies in Huntington's Disease	358
5. Diffusion MRI Studies in Huntington's Disease	363
6. Magnetization Transfer Imaging Studies in Huntington's Disease	368
7. Iron Sensitive MRI Studies in Huntington's Disease	369
8. Conclusions	372
References	373
<b>10. Functional Magnetic Resonance Imaging in Huntington's Disease</b>	<b>381</b>
Sarah Gregory and Rachael I. Scahill	
1. Introduction	382
2. Task fMRI Studies in Huntington's Disease	385
3. Resting State fMRI Studies in Huntington's Disease	395
4. Conclusions	403
Acknowledgment	403
References	404
