

VOLUME ONE HUNDRED AND FOUR

ADVANCES IN PARASITOLOGY

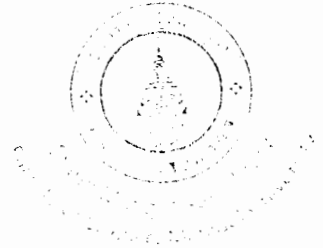

Edited by

D. ROLLINSON

*Life Sciences Department
The Natural History Museum,
London, United Kingdom*

J. R. STOTHARD

*Department of Parasitology
Liverpool School of Tropical Medicine,
Liverpool, United Kingdom*

ACADEMIC PRESS

An imprint of Elsevier

Contents

<i>Contributors</i>	<i>vii</i>
1. <i>Leishmania tropica</i>: What we know from its experimental models	1
Mosayeb Rostamian and Hamid M. Niknam	
1. Introduction	2
2. What is leishmaniasis	3
3. <i>L. tropica</i> , a neglected species	4
4. <i>L. tropica</i> infection in human (manifestation and immunology)	8
5. Experimental models for <i>L. tropica</i> infection	12
6. Factors affecting disease outcomes in <i>L. tropica</i> infection	29
7. Conclusion and perspectives for future work	30
References	31
2. A new level of complexity in parasite-host interaction: The role of extracellular vesicles	39
Maibritt Mardahl, Anne Borup, and Peter Nejsum	
1. Introduction --EVs in infectious disease	40
2. Parasites and their extracellular vesicles	53
3. Translational aspects of parasite EVs: Vaccine, diagnostic, and therapeutic potential	87
4. Challenges in the parasite EV field	95
Acknowledgement	97
References	97
3. The cathepsin-like cysteine peptidases of trematodes of the genus <i>Fasciola</i>	113
Krystyna Cwiklinski, Sheila Donnelly, Orla Drysdale, Heather Jewhurst, David Smith, Carolina De Marco Verissimo, Izanara C. Pritsch, Sandra O'Neill, John P. Dalton, and Mark W. Robinson	
1. Introduction	114
2. Phylogenetic relationships of the cathepsin L-like cysteine peptidases	117
3. Gene profile	122
4. Protein expression	123

5. Structure-function relationships of the <i>Fasciola</i> cathepsin endopeptidases	128
6. Regulation of cathepsin peptidase activation	132
7. Regulation of cathepsin peptidase activity by co-secreted inhibitors	134
8. Biological roles of <i>Fasciola</i> cathepsin-like cysteine peptidases	138
9. Conclusion	150
Acknowledgements	153
References	154
4. Echinococcosis transmission on the Tibetan Plateau	165
Phil S. Craig, Patrick Giraudoux, Zheng Huan Wang, and Qian Wang	
1. Introduction	166
2. Human echinococcosis on the Tibetan Plateau	175
3. Domestic animals and echinococcosis in Tibetan communities	191
4. Wildlife and echinococcosis on the Tibetan Plateau	201
5. Transmission ecology of <i>Echinococcus</i> spp. on the Tibetan Plateau	211
6. Surveillance, control and prevention of echinococcosis in Tibetan communities	222
7. Conclusions and considerations	228
Acknowledgements	229
References	229
Further reading	246
5. Diagnosis and drug resistance of human soil-transmitted helminth infections: A public health perspective	247
Polydor Ngoy Mutombo, Nicola W.Y. Man, Peter Nejsum, Robert Ricketson, Catherine A. Gordon, Gemma Robertson, Archie C.A. Clements, Nathalie Chacón-Fonseca, Veeranoot Nissapatorn, Joanne P. Webster, and Mary-Louise McLaws	
1. Introduction	248
2. Diagnosis of soil-transmitted helminths	252
3. Drug resistance	280
4. Soil-transmitted helminthic zoonoses in humans	282
5. Concluding remarks and the way forward	287
Acknowledgement	298
Authors' contributions	298
Conflict of interest	298
Appendix. Application of ASSURED criteria in diagnostics of soil-transmitted helminthiasis (STH): A new designation for ReASSURED	298
References	307
