vii

1. Multilayer regulation of CD4 T cell subset differentiation in the era of single cell genomics	1
Waradon Sungnak, Chao Wang, and Vijay K. Kuchroo	
1. CD4 T cell subsets: Traditional lineage paradigm	2
2. CD4 T cell plasticity versus functional heterogeneity	6
3. Regulatory networks of CD4 T cell differentiation and functions	12
4. Lineage and functional modularity in follicular helper T cells and follicular regulatory T cells	16
5. Concluding remarks	19
Acknowledgments	20
References	21
2. Transcription factories in <i>Igκ</i> allelic choice and diversity	33
Sophiya Karki, Shiladitya Banerjee, Kaitlin Mclean, Aaron Dinner, and Marcus R. Clark	
1. <i>Igκ</i> structure	34
2. Generation of V_{κ} - J_{κ} repertoires and unanswered questions	35
3. Recruitment of V_{κ} gene containing TADs to transcription factories	37
4. Regulation of V_{κ} transcription by cyclin D3	40
5. Chromatin loop structure is constrained in nuclear niches	41
6. Summary	45
References	46
3. <i>Cis</i>- and <i>trans</i>-factors affecting AID targeting and mutagenic outcomes in antibody diversification	51
Leng-Siew Yeap and Fei-Long Meng	
1. AID-initiated antibody diversification processes	52
2. Specific targeting of AID mutagenic activity	55
3. Mutagenic outcome of somatic hypermutation	66
4. Deletional outcome of class switch recombination (CSR)	73
5. Unleash the mutagenic power of AID in diversifying base editors (DBEs)	79
6. Perspective	82
Acknowledgments	84
References	84
Further reading	103

4. Signaling control of antibody isotype switching	105
Zhangguo Chen and Jing H. Wang	
1. Overview of antibody-mediated humoral immunity and class switch recombination	106
2. Different receptors that signal to regulate CSR	111
3. AID and its regulation	128
4. Signaling balance for CSR	140
Acknowledgments	149
Compliance with ethics guidelines	149
References	149
