

VOLUME ONE HUNDRED AND FOUR

ADVANCES IN GENETICS

Edited by

DHAVENDRA KUMAR

*Division of Cancer and Genetics,
Institute of Medical Genetics,
Cardiff University School of Medicine, Cardiff;
The Genomic Policy Unit,
The University of South Wales, Pontypridd,
United Kingdom*

ELSEVIER

ACADEMIC PRESS

An imprint of Elsevier

Contents

<i>Contributors</i>	<i>vii</i>
<i>Preface</i>	<i>ix</i>
1. Genomic technologies for <i>Hevea</i> breeding	1
Radhakrishnan Supriya and Padmanabhan Mallinath Priyadarshan	
1. The genomics paradigm	4
2. Non-expressed molecular genetic markers (MGMS)	5
3. Expressed genes in <i>Hevea</i>	7
4. Perspectives	56
References	62
Further reading	73
2. Association mapping in plants in the post-GWAS genomics era	75
Pushpendra K. Gupta, Pawan L. Kulwal, and Vandana Jaiswal	
1. Introduction	77
2. Major genes/QTL identified for important traits in major crops following GWAS	79
3. Utilization of genes/QTL identified by GWAS for crop improvement	83
4. Improvement in GWAS over the years	83
5. Limitations of GWAS	99
6. Rare variants and missing heritability	102
7. Post-GWAS analysis	105
8. Popular resources available for GWAS in plants	132
9. Post-GWAS results for crop improvement	132
10. Conclusions and perspective	134
Acknowledgments	135
References	136
