<b>1. Non-heme iron enzyme-catalyzed complex transformations: endoperoxidation, cyclopropanation, orthoester, oxidative C-C and C-S bond formation reactions in natural product biosynthesis</b>	<b>1</b>
Heng Song, Nathchar Naowarojna, Ronghai Cheng, Juan Lopez, and Pinghua Liu	
1. Introduction	2
2. Verruculogen biosynthetic pathway	3
3. Fumitremorgin B oxidase (EAW25734)	24
4. Novofumigatonin biosynthetic pathway	27
5. EasH: an oxidase involved in cycloclavine biosynthesis	33
6. Orthoester formation in hygromycin B biosynthesis	36
7. Nogalamycin biosynthesis	39
8. Ergothioneine and ovothiol biosynthesis	42
9. Conclusion	49
Acknowledgments	49
References	49
<b>2. Glutarate L-2-hydroxylase (CsiD/GlaH) is an archetype Fe(II)/2-oxoglutarate-dependent dioxygenase</b>	<b>63</b>
Caitlyn Q Herr, Lee Macomber, Efthalia Kalliri, and Robert P. Hausinger	
1. Introduction to CsiD	64
2. Functional assignment of CsiD	67
3. Characterization of glutarate L-2-hydroxylase	73
4. Distribution of glutarate L-2-hydroxylase	80
5. Cellular role of glutarate L-2-hydroxylase	81
6. Conclusions	84
7. Experimental section	84
Acknowledgments	86
References	86

---

<b>3. Comparison of DNA and RNA substrate effects on TET2 structure</b>	<b>91</b>
Emmett M. Leddin and G. Andrés Cisneros	
1. Introduction	92
2. Methodology	94
3. Results and discussion	96
4. Conclusions	109
Acknowledgments	109
References	109
<b>4. Structure-function relationships in KDM7 histone demethylases</b>	<b>113</b>
Shobhit S. Chaturvedi, Rajeev Ramanan, Sadiq O. Waheed, Tatyana G. Karabancheva-Christova, and Christo Z. Christov	
1. Introduction	114
2. Biological and pathological role	115
3. Structure and mechanism	115
4. Dynamics of KDM7 enzyme-substrate complex	117
5. Reactivity studies of model system	121
6. Inhibitors of KDM7	122
7. Conclusions	123
References	124
