at room P114

1st Floor, Physics Building

With an estimated 70,000 active journals today, how do you know?

- Which journals are suitable for your research?
- How to quickly find out which journals are most published by your researchers?

Designing your publication strategy:

- Which journals are most highly ranked in their field?
- How to know if a journal publishes up to date research?
- How to choose a journal that has high citation longevity?
- How to find a journal that gets cited very quickly?
- How to quickly find related journals?
- How to use journal citation data for collection management?
