P6-3

**Mrs. Ruchareka Wittayawuttikul**

Senior Information Specialist / Assistant Dean for Information  
Faculty of Science, Mahidol University  
Email: ruchareka.wit@mahidol.ac.th

**OPEN ACCESS JOURNALS:  
QUANTITY VS QUALITY**

Journal publishing business models in the internet era has gradually shifted from traditional (subscription-based) to open access (author-side payment) model. Open access (OA) journals do not charge readers or their institutions for access fee. All readers have the right to read, download, copy, distribute, print full-text articles by using Creative Commons Attribution (CC-BY) license. In term of quantity, scientific publishing has been accelerating and moving to open access with a rapid growth rate during the past fifteen years. The model of publishing should not affect quality of publication if OA journals and traditional journals can maintain a good standard of editorial process and peer-review system. However, some OA journals have been conducting business that jeopardizes good practice of scholarly journals. Authors should publish their articles in journals that are indexed in Web of Science (*Thomson*) and/or Scopus (*Elsevier*) and/or other reliable academic databases. The journals of choice should also belong to acceptable publishers with positive reputation. The journal's publishers should not be listed on Beall's list of predatory OA publishers. The journal's publisher should be a member of the Open Access Scholarly Publishers Association (OASPA) and strictly follow its code of conduct.

*Mrs. Ruchareka Wittayawuttikul is currently the Senior Information Specialist / Assistant Dean for Information at the Faculty of Science, Mahidol University, Rama VI Road, Bangkok 10400, Thailand, Tel: +662 201 5891 e-mail: ruchareka.wit@mahidol.ac.th*

*Education: M.Sc. (Tropical Medicine), Mahidol University, 1985, B.Sc. (Medical Technology), Chiangmai University, 1981*

*Training: Mahidol University Executive Development Program, 2007, European Summer School for Scientometrics, Vienna, 2011*
